COMMON QUESTIONS

Can you migrate us from Salesforce? Growth includes up to 50,000 records from one CRM. A full Salesforce-to-HubSpot migration with custom objects and pipeline mapping is the migration add-on, quoted after a portal audit.

What does the Breeze Prospecting Agent need? Breeze credits on your HubSpot subscription and a defined target segment. We configure it for one segment, run it with a pilot group and tune it before go-live.

Standard on every package. Every Launch package includes a named senior consultant from kickoff to go-live, a written project plan, weekly status, build and test in a sandbox where the platform has one, one UAT cycle, admin documentation, recorded training and 30 days of hypercare. Never included: software licenses, custom code unless listed, integrations not named, content beyond the numbers listed, legal or compliance approval, on-site work and travel.
