

MULESOFT

CloudHub 1.0 to 2.0 Migration

Move your Mule application fleet from CloudHub 1.0 to 2.0 in planned waves, with TLS updates, regression support and a cutover plan.

PRICE

Quote-based

TIMELINE

4-6 weeks

SIZED FOR

Up to 10 apps per block

WHAT'S INCLUDED

- Inventory and assessment of the app fleet
- Migration plan and wave schedule
- Migration of up to 10 apps to CloudHub 2.0 (shared space or an existing Private Space)
- TLS, certificate and property updates; deployment configuration
- Regression testing support
- Cutover and rollback plan; decommission checklist
- Each further block of 10 apps quoted

NOT INCLUDED

- Code refactoring beyond what the runtime upgrade requires
- Mule runtime upgrades of more than one major version
- Functional changes
- Client regression test execution

You provide

- Source code access
- Test environments and testers for each app

Assumptions

- Delivered remotely, in English

Done means: Migrated apps run in production on CloudHub 2.0 for 5 business days; CloudHub 1.0 apps stopped.

COMMON QUESTIONS

How is the CloudHub migration priced? By blocks of 10 applications, quoted after an inventory of your fleet. A 30-app fleet is typically three blocks delivered in waves.

Standard on every package. Delivered by a named senior consultant with a written plan, weekly status, one UAT cycle, documentation of what we built and 30 days of hypercare on delivered scope. Never included: software licenses, custom code unless listed, integrations not named, content beyond the numbers listed, legal or compliance approval, on-site work and travel.
